Ceramics

Mr.
Pritchard

Jane & Gordon MARTZ

marshall studios, inc.

A few words might be said to clarify the picture of Marshall Studios production.

Clay and glaze materials are purchased from various parts of the world and weighed out to formulate our own body and glazes.

The original forms are made in plaster or clay and used as models for plaster molds. Clay is cast or pressed into plaster molds - wheel thrown pots are made on special order, sold locally, sent to shows or tried for new three dimensional ideas for future forms.

Decorations are accomplished by wax resist, sgraffito, underglaze, majolica and slip trailing.

Glazes are applied by brushing, dipping and spraying. The glazes are selected with an attempt to fit the surface quality of the piece to the feeling of the form.

Most of the ware is twice fired, final glaze firing is to stoneware temperature cone 9 or 2350 degrees F., forming a hard and durable clay. Firing is achieved in periodic, down-draft kilns using liquid propane gas.

Ware is ground or felted and the lamps are furnished with walnut fittings, hand-turned and finished at the studio. Ceramic and wood husks are employed on some bases, incorporated into the design and used for obtaining a more efficient spread of light.

Three-way sockets and Bolite harps are employed whenever possible; however, it is necessary to use one-way sockets on several of the smaller units - you will find this information in the description of each lamp.

Shades are custom made, and the various textures shown in the lamp photographs are interchangeable, with the exception of cane, which can be made in cylinders only. We maintain a complete special order lampshade service, and full information is available upon request. Shades are integrated with glazes and the ceramic bases to form a lamp unit without limitations - composed to supply quality, reasonable price, and a carefully designed unit.

In numbering the ware, the first number is the form, the second the glaze, and the third number the decoration. The glaze numbers and their corresponding colors are listed below, and may be applied to any UNDECORATED piece in this folder, if a change in glaze is desired.

MATTE GLAZES

- 28 white
- 30 dark brown
- 31 dark green (smoke)
- 32 light brown
- 33 textured green
- 35 textured grey
- 45 black

DECORATED ware is usually worked out successfully as shown in the catalog, and due to technical reasons, deviations from our combinations cannot be made.

THIS CATALOG (NO. 4) SUPERSEDES ALL OTHERS - our line now consists only of the ware as shown. We regret that it has been necessary to temporarily discontinue wood lamps.

SHIPMENTS are made whenever practicable by Parcel Post. We have a second class post office in Veedersburg, and can ship a parcel 100 inches in length and girth, weighing seventy pounds, which is not possible in a first class post office. Sometimes, however, a lamp is too large (M55 for example), and must be sent by Express, due to the size limitations of Parcel Post shipments. Large orders may be sent by rail freight or truck. We shall appreciate shipping instructions if transportation other than Parcel Post is desired.

Jane Marshall Martz and Gordon Martz, the designers of our ceramic lamps and accessories, attended Alfred University, the New York State College of Ceramics, Alfred New York.

They have been making ceramic lamps and accessories at the studio since June, 1951, and it has been necessary to greatly increase their facilities since then because of the growing demand for their ware.

Mr. and Mrs. Martz were fortunate in having a group of their pieces accepted by Good Design, which is sponsored by the Museum of Modern Art, New York, and the Merchandise Mart of Chicago, in January of 1953, and they have had several other awards during the past two years.

A catalog is issued every six months to assure our customers of full and up to date information on our ware, and complete samples are shown at the Palmer House Lamp Show in Chicago, and at the LaSalle Hotel with the Eastern Exhibitors in Chicago.
